A new mobility aid
securement system
that is safer, quicker,
and easier to operate.
Innovative system
allows both hands to
be free to secure the
mobility aid.

Mobility Aid Securement

"American Seating's new securement system is a smart investment; our passengers, drivers, and maintenance team are happy and better served by having it."

– Transit Authority Principal

**Easier.
Quicker.
Safer.**

American Seating's mobility aid securement system is comprised of the industry-leading **A.R.M.®** and new **Dual Auto-Lok™** remote release system. This new, innovative system allows both hands to be free to secure the mobility aid, providing easier and quicker securement and reducing physical demands on the driver. Passengers using most mobility aids can be secured in less than half the time of manual systems.

Features/Benefits

- Time saver; passengers can be secured easier and quicker
- Reduces physical demands on driver and personal injuries
- Lowers both operations and maintenance costs
- Prevents loss or theft associated with loose belts; restraint belts positioned and secured off the floor for easier access and maximized life
- Auto-tensioning and auto-locking retractors; "S" hooks attach quickly and easily to mobility aids
- Superior vandal and corrosion resistance
- Heavy-duty construction for long life
- Modular system easily adapts to majority of vehicle layouts for retrofit
- All applications support 3-point occupant restraint lap and shoulder belts
- ADA compliant, safe and secure

Dual Auto-Lok™

- Patent-pending system with built-in time delay mechanism allows free movement of belts for preset time and both hands to be free to secure the mobility aid, which minimizes awkward body movements and saves time (conventional systems require one hand always holding the belt release)
- Non-power maintenance-free system has no cables, wiring or components to adjust or replace
- Compact modular design integrates with barriers and forward facing flip-up seating; allows quick and easy replacement of components if needed, and easily adapts to the majority of vehicle layouts for retrofit

Advanced Restraint Module – A.R.M.®

- Patented and exclusive positive-locking safety feature provides easier, quicker and safer securement
- Telescoping model features integrated quick-release mechanism
- Available for front, center or rear tie-down applications and in a pivoting model-type
- Stores easily when not in use
