Upholstered Seat Cushions

Vandalized with
Unprotected Seat Cushion

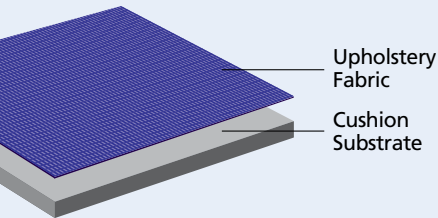

Vandalized with
VR-50 or CR-50 Protected Seat Cushion

VR-50® and CR-50®

ENGINEERED TO LAST.

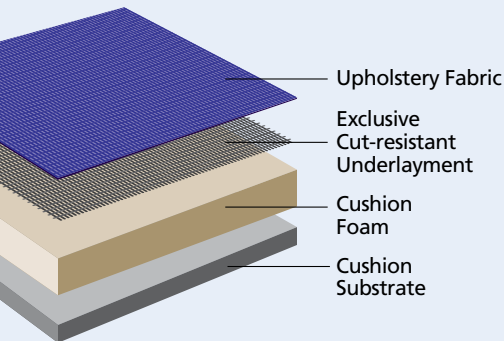

VR-50

Advanced Material Engineering.

Vandalism is a major concern of transit agencies, and the single biggest cause of repair. American Seating's exclusive VR-50 and CR-50 materials and processes have combined comfort with vandal-resistance to provide value-added fabric cushions that absorb cuts, slashes, and other abuse.

CR-50

VR-50

Unsurpassed vandal resistance

FEATURES

- Patented vandal resistant upholstered seat and back cushions
- Uniquely bonded fabric absorbs cuts, slashes and abuse for long-lasting good looks
- Passenger-pleasing comfort
- Maintains contoured shape—will not delaminate or deform
- Available in a wide range of fabrics, colors and patterns
- Lightweight design
- Cushion inserts/onserts are designed for quick release for ease of maintenance
- Designed and tested to meet stringent American Seating and customer requirements

CR-50

Provides maximum seating comfort and vandal resistance

- Exclusive padded vandal resistant seat and back cushions provide enhanced seating comfort
- Standard pad and plush-pad cushions available for maximum comfort and vandal resistance
- Available in a wide range of fabrics, colors and patterns
- Cushion inserts/onserts are designed for quick release for ease of maintenance
- Designed and tested to meet stringent American Seating and customer requirements

Engineered to last

VR-50 and CR-50 cushions have been engineered to exacting standards to achieve unsurpassed wearability, as well as vandal and cut resistance. Each has undergone thorough testing for adhesion integrity, heat/flammability/toxicity resistance and cut-resistance to ensure maximum durability.

For over 120 years, American Seating has set the standard for product design, durability and comfort. For the past 60 years, our achievements in transportation seating are a result of our commitment to those standards and have become *the* industry benchmark. Today, with products like **VR-50** and **CR-50**, we remain focused on developing innovative solutions that meet the needs of public transportation and continually strive to exceed customer expectations.
