

Vision[®]

American Seating has *Vision*[®]

Built to endure, *Vision* provides the ultimate in vandal resistance with high style and superior comfort.

Vision[®]-NU

Non-upholstered (NU) onsets are available in seven standard colors. Polished stainless-steel back panel is standard on all 18" transverse model types.

Vision

A variety of quick-release cushion options are available.

Vision's Stainless-Steel Construction

The three-dimensionally formed tubular steel frame follows the perimeter continuously to create the ergonomic shape of the seat and the structure. The structure is also enhanced by heavy gauge stainless-steel cross members. An all stainless-steel lower-mounting system is standard. Each seat module is individually mounted to the lower structure for easy maintenance.

Stainless-steel or thermoplastic grab handles are inserted into the open end of the tube and riveted for enhanced securement. Molded-fiberglass or upholstered onsets are attached to fit the perimeter of the frame with a quick-release onset system for easy maintenance. The three-dimensionally formed stainless-steel back panel is held in place with eight hidden fasteners.

Features

Ultimate in Vandal Resistance

All stainless-steel construction and no visually exposed fasteners provide the ultimate in vandal resistance. A seamless frame with no visually exposed welds and an all-polished finish is easy to maintain.

Superior Comfort

The most comfortable stainless-steel seat in the industry has an ergonomic design that features the largest personal seating area, a slim-line profile, increased back height, spaciousness in legroom, and seat and back cushions to meet specific customer needs.

Easier Installation

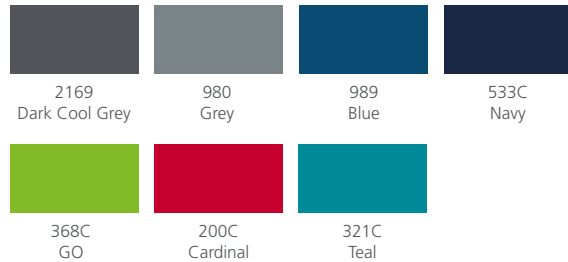

The modular design allows replacement of a single seat or major component if necessary. The seat's design minimizes the number of dirt-collecting areas by eliminating spacers.

Unsurpassed Quality

One-piece continuous stainless-steel modular frame results in improved consistency in fit and finish. Designed to meet or exceed White Book standards and Docket 90A.

Fiberglass Insert Color Selection

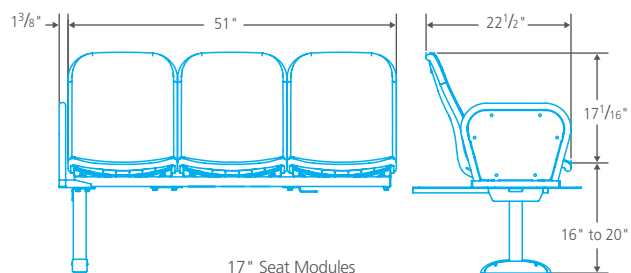

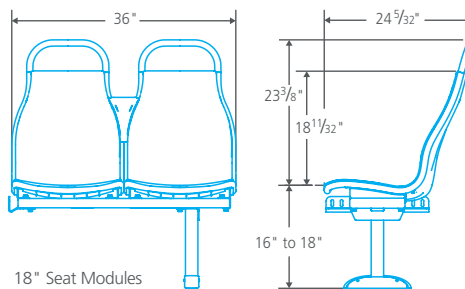

Custom colors also available, minimum order quantities and additional costs may apply

Thermoplastic Grab Rail Color Selection
