

4-Point Mobility Aid Securement

4-Point Securement

Several 4-Point system options are available for Mobility Aid Securement and Occupant Restraint from American Seating. The genesis of the 4-Point system was the innovative front securement **A.R.M.**® or Advanced Restraint Module. The **A.R.M.**'s exclusive telescoping feature allows for easy deployment and storage when not in use. Whether a barrier panel or transverse flip-up seat is used in the securement area, the 4-Point Securement system is a proven A.D.A. solution.

BARRIER

A.R.M.

PIVOTING A.R.M.

Features

- All 4-Point securement times – less than 60 seconds
- All 4-Point systems do not require electrical power
- Barrier – Integrated belt hook stowage away from occupant
- **A.R.M.** – Foot pedal release with positive, audible lockout
- Belts – Auto-tensioning and auto-locking retractors
- Belts – Color-coded “red” for mobility aid securement and “black” for occupant restraint

Options

- Barrier – Remote release of rear mobility belts
- **A.R.M.** – Pivoting model for center location of two securement areas
- **A.R.M.** – Pull-Pin release model
- Belts – Manual tensioning mechanisms

Compliance

- All 4-Point systems fully A.D.A. specification compliant
- Tested to meet or exceed all applicable U.S. and Canadian vehicle safety standards

Our Mission

Since 1886, American Seating has set the standard for product design, durability and comfort. Our first transportation seat was introduced in 1931, and today we remain committed to exceeding the expectations of our customers. Our achievements serve as the platform for new and innovative products that are the benchmarks of our industry.
