

## 2000 Series Unbelted Recliners

## 2000 Series Recliner Is Available in Four Distinctive Styles

### Model 2000 Recliner

**The 2000** creates a new standard in recliner seating, with seat and back cushion contours designed to comfortably accommodate a wide range of passengers. Paired with a contoured, adjustable headrest, the 2000 Recliner sets the new milestone for passenger seating comfort.

### Model 2003 Recliner

**The 2003** has an S-shaped, contoured back that tapers towards the top of the recliner to allow better sight lines. Its one-piece back features an integrated headrest and is ergonomically designed to provide lumbar support for added passenger comfort.

### Model 2005 Recliner

**The 2005** has a full width, S-shaped, contoured reclining back for an added measure of passenger privacy and exceptional comfort. These features make it a smart choice for suburban transit buses and private motorcoach use.

### Model 2095 Recliner

**The 2095** has a contoured seat and back cushion with a fuller back for passenger privacy, incorporates an integrated headrest.

## Footrests

Choose from two footrests, the self-storing model or two-position model. Both provide added passenger comfort and are designed to support in excess of a 500-pound vertical load for safety.

All materials used in the 2000 Series Recliners are tested to ensure long life and compliance with federal transportation safety standards, as well as our own uncompromising requirements.

## Armrests

### Aisle Side Armrests

Choose from two different aisle side armrests, either our standard fold down armrest or the optional fold up armrest. Both feature a convenient fingertip recline button located on the end of the armrest with an infinite number of stops within the 8" recline range. Each armrest supports in excess of 500 pounds of vertical load and 250 pounds of horizontal load for durability and safety.

### Optional Fold-up Armrest

An optional fold-up armrest is available on 2000 Series Recliners. For easy ingress and egress, simply lift this armrest upward until it stops automatically or fold it downward for active use. With no locks to release, this allows open access to the seat from the aisle.

### Standard Fold-down Armrest

To operate the standard fold-down armrest, simply pull up on the palm shaped handle while rotating the armrest forward. To restore this armrest to the upright position, simply rotate it upwards and it will automatically lock into place. This armrest features an alternative, non-locking stop to facilitate cleaning.

### Options:

- Two seat widths (see below)\*
- Optional foam and covers to ASTM D-3675, ASTM E-662 and FAR 25.853b
- Self-storing manual footrest (standard)
- Two-position autorise footrest
- Aisle side fold-down or fold-up armrest
- Center-folding armrest (up)
- Tufted upholstery (Models 2003 and 2005)
- Aisle light
- Beverage holder
- Fold-up tray
- Expanding mesh magazine holder
- High impact thermoplastic back panel (Model 2003)
- Stainless steel back panel (Models 2005 and 2095)
- Seat-back grab handle with coat hook
- Top-mounted grab handle (Models 2003, 2005 and 2095)
- Seat-back audio
- Secura® mobility aid securement system
- Reversible seats
- Two and one executive seating
- Front mount 110 or USB power outlets

### Fold Down Armrest

**Left:** A palm-shaped release handle on the standard armrest allows you to easily fold the arm down.

**Right:** A convenient recline button puts back recline adjustment at your fingertips.

\* When ordering wider seat, indicate with "W" in front of model number (for example, W2003).
